- **All 310 rooms boast spectacular oceanfront views and private balcony**
- **Four gourmet and exquisitely-designed restaurants with ocean views**
- **Fresh water infinity pool with breathtaking views of the ocean**
- **Very close to a beautiful golf course located inside Tucán Country Club**
- **Located 30 minutes from the Panama Canal Miraflores Locks**

PANAMA

A country in Central America situated between North and South America. It is bordered by Costa Rica to the west, Colombia to the southeast, the Caribbean to the north and the Pacific Ocean to the south. The capital and largest city is Panama City, whose metropolitan area is home to nearly half of the country's 3.9 million people. The fastest growing economy and largest per capita consumer in Central America. In 2013, Panama ranked 5th among Latin American countries in terms of the Human Development Index, and 59th in the world. The Panama Canal consists of 48-mile (77 km) ship canal in Panama that connects the Atlantic Ocean (via the Caribbean Sea) to the Pacific Ocean. Panama's wildlife holds the most diversity of all the countries in Central America. It is home to many South American species as well as North American wildlife. Nearly 500 rivers lace Panama's rugged landscape. Come check out Panama, the booming city with soaring skyscrapers towering for miles along its coastline.

RAINFOREST

Panama's tropical environment supports an abundance of plants. Forests dominate, interrupted in places by grasslands, scrub, and crops.

Mangrove swamps occur along parts of both coasts, with banana plantations occupying deltas near Costa Rica. In many places, a multi-canopied rain forest abuts the swamp on one side of the country and extends to the lower reaches of slopes on the other.

PANAMA CANAL

Panama's economy, because of its key geographic location, is mainly based on a well developed service sector especially commerce, tourism, and trading. The handover of the Canal and military installations by the United States has given rise to large construction projects.

The canal is of major economic importance because it pumps millions of dollars from toll revenue into the national economy and provides massive employment.
